

Dannah Tiamson

DANNAH JANELLE MENDOZA TIAMSON

ABOUT ME

I'm someone who loves exploring and pushing myself to grow, especially when it comes to things I'm passionate about. I find joy in trying new things and expanding my skills in areas that spark my interest, whether it's going on adventures or taking on challenges. I'm always enthusiastic and determined, dedicated to learning and improving, both personally and professionally.

PROJECTS

You can check my **GitHub account** under the username "**djtiamson**," where you'll find some of the projects I have worked on. As an Information Systems student, most of these projects were completed as part of my university coursework. These include projects such as:

- Point of Sale systems
- ATM Simulations
- Programs demonstrating Inheritance
- Password Checker
- Minesweeper Game
- Database Management System (DBMS)

I have also worked on graphic design work, which were either commissioned by clients or done as part of school projects, using software such as Adobe Photoshop and Canva. Feel free to contact me if you would like to see additional examples of my work.

- Invitations
- Magazines
- Brochures
- Tarpaulins
- Food menus
- Logos

ADDITIONAL SKILLS

- Managed personal YouTube channel for 2 years (2019-2021), accumulating 50k subscribers and approximately 5M total views.
- Served as president of Red Cross Youth Club for 1 year (2019-2020), demonstrating leadership skills and organizational capabilities.
- Has experience in online sales, including product photography, customer communication, and managing billing processes. Previous businesses include selling second-hand books, clothes, uniforms, and tech items.
- Led a team for a school thesis project focused on developing a fire alarm system using an Arduino platform. Our project received the award for Best Project among our batch.
- Passionate about creating and editing reels for personal social media platforms, with a keen eye for visual storytelling and content engagement. You can view some of my work on **Instagram** under the username **@y.dnile**, where I have shared some of the reels I've created.
